

Brief

My Sweet tea is a Casual Dining and Tea Lounge, so mostly teens and adults would go there to eat and hangout with friends or meet up with people during break. The people that are most likely to look up the place would be people who like Bubble tea, looking for a place to eat sushi, or just want to find a place to hangout or meet up. My plan is to build a clean and responsive site for a Bubble Tea and Sushi Casual Dining and Tea Lounge because their original site wasn't responsive and I felt that they needed some more design to it. The original site felt like it needed to be worked on. I am thinking of using colours that would represent the colours from Bubble tea and also the colours from sushi.
